
(a)
Symmetry class probability $P(n)$
Symmetry class index n
Target state P_{target}
Uniform baseline P_{rand}
Noiseless simulation P_{sim}
Experiment P_{exp}
(b)
$P_{\text{exp}} - P_{\text{rand}}$
$P_{\text{sim}} - P_{\text{rand}}$
Ideal recovery ($\lambda = 1$)
Linear fit ($\lambda = 0.813$)
Experimental data
(c)
Symmetry class probability $P(n)$
Symmetry class index n
Target state P_{target}
Uniform baseline P_{rand}
Noiseless simulation P_{sim}
Experiment P_{exp}
(d)
$P_{\text{exp}} - P_{\text{rand}}$
$P_{\text{sim}} - P_{\text{rand}}$
Ideal recovery ($\lambda = 1$)
Linear fit ($\lambda = 0.742$)
Experimental data
